## Synopsis:

In the aftermath of an unprecedented environmental disaster, Detective Emily Carter finds herself investigating a series of gruesome murders. The victims, all prominent figures in the biotechnology industry, have been killed in a brutal and seemingly random manner.

As Emily delves deeper into the case, she uncovers a sinister plot that threatens to destroy not only the city but the entire planet. A rogue scientist has genetically engineered a deadly plant species that is immune to all known pesticides. This plant, known as "unnaturally green," is spreading like wildfire, consuming everything in its path.

With the clock ticking down, Emily must race against time to stop the plant before it consumes the city. But as she gets closer to the truth, she realizes that the enemy is not just a plant. It is something far more sinister and powerful, something that will stop at nothing to protect its deadly secret.

### **Review:**

"Unnaturally Green is a gripping and thought-provoking environmental horror novel that explores the terrifying consequences of human greed and the destruction of nature. Felicia Ricci has crafted a chilling tale that will keep you on the edge of your seat from beginning to end."

-Publishers Weekly

### **About the Author:**

Felicia Ricci is an award-winning author of environmental horror novels. Her work has been praised for its realism, suspense, and thought-provoking themes. She lives in New York City with her husband and two children.
